REPORTS AND STUDIES

THE ECONOMIC AND FINANCIAL
SITUATION IN GERMANY

Contents

Part I — The German economy adjusting to unification and a changing global economy	1
1. Introduction	3
2. The short-term outlook: how strong will the recovery be?	4
3. The German economy after unification: considerable change in structure	6
4. The fiscal situation	10
5. Monetary policy	13
5.1. The final target: price stability	13
5.2. Monetary indicators	14
5.2.1. Monetary aggregates	14
5.2.2. Exchange-rate developments	15
5.2.3. Real interest rates and the yield curve	17
6. Labour market challenges	18
6.1. Unemployment rising to unacceptably high levels	18
6.2. The impact of the west German recession	19
6.3. The restructuring in eastern Germany	19
6.4. Structural problems in western Germany	21
6.5. Combining wage moderation with flexibility	22
6.6. The east German labour market: a structural challenge	23
7. Summary and conclusions	23
Part II — Extended assessment of major issues	25
Chapter 1: Fiscal policy	27
1. Introduction	27
2. A brief look back	27
2.1. The impact of recessions on German public finances	27
2.2. The 1981/82 consolidation efforts: successful but facilitated by special events	27
2.3. Continuing consolidation: some lessons from the 1980s	31
2.4. The situation in 1989, after extended consolidation	32
3. Unification from a fiscal point of view	32
3.1. The initial fiscal approach to unification	32
3.2. Reality proved to be less benign	33
3.3. Reactions to reality	35
3.4. Consequences	35
4. The challenges ahead	37
4.1. Worrying debt and deficit dynamics	37
4.2. Reasons for and steps towards consolidation	39
4.2.1. The consolidation challenge	39
4.2.2. Consolidation measures taken	43
4.3. The challenge of successful consolidation: 'crowding-in'	44
4.4. Safeguarding the conditions for recovery: what are the risks?	47

<i>Box 1: 'Off-budgets' in the context of German unification</i>	48
<i>Box 2: Borrowing series — the German case</i>	50
References	52
Chapter 2: Inflation and monetary policy	53
1. Introduction	53
2. Inflation developments	53
2.1. The cost of living index (CLI)	53
2.2. Domestic demand prices and GDP component prices	56
2.3. Producer prices	57
3. Monetary policy	57
3.1. Monetary aggregates	57
3.2. Interest-rate policies and exchange rates	62
3.3. Developments in real exchange rates	66
4. Linking money supply with inflation: the P* approach	70
4.1. Basic concepts	71
4.2. Long-term velocity	72
4.3. Production potential and output gaps	73
4.4. The dynamics of price adjustment	75
4.5. Some implications	78
<i>Box 1: Major issues in the pursuit of monetary targets</i>	79
<i>Box 2: Yield curve as a predictor of economic activity</i>	80
References	81
Chapter 3: The balance of payments	83
1. Important shift in the external balance following unification	83
2. The changing pattern of exports, imports and capital flows	85
3. Underlying factors: domestic expenditure/savings balances	88
4. The outlook for exports: the effect of the DM exchange rate	89
5. Conclusion: will Germany continue to run a current-account deficit?	90
Chapter 4: The labour market: trends in productivity and cost competitiveness	93
1. Introduction	93
2. Recent trends against the background of long-term developments	94
2.1. Performance of the west German labour market: an overview	94
2.2. Main features of the east German labour market	96
2.3. The structure of unemployment	99
3. Macroeconomics of the west German labour market	99
3.1. Inflation/unemployment dynamics	100
3.2. Wage/productivity pattern in west German manufacturing eroding competitiveness	101
3.3. The unification boom: excessive expectations	104
3.4. Concluding remarks: structural unemployment one step up again	105

4.	Structural issues	107
4.1.	The sectoral employment pattern: is western Germany 'overindustrialized'?	107
4.2.	Inflexibilities, but recent signs of improvement	109
4.3.	Structural problems continue in eastern Germany	110
5.	Prospects for the German labour market	111
5.1.	The short-term outlook	111
5.2.	Scenarios for the labour market and catching-up in eastern Germany	112
5.3.	The long-term outlook: major challenges ahead	113
5.4.	The evolution of wages	113
6.	The unemployment problem: some general observations on labour market performance	114
7.	Conclusions	117
<i>Box: A model for regional growth and convergence</i>		118
 Chapter 5: Economic developments in eastern Germany since unification		121
1.	Introduction	121
2.	Reasons for the crash	122
2.1.	The cost-competitiveness problem	122
2.2.	The marketing problem	124
2.3.	Other problems of transition	124
3.	The eastern economy following the initial shock of adjustment	125
3.1.	The overall situation after the collapse	125
3.2.	Structural features	125
4.	A look ahead	128
4.1.	Prospects for the cost-productivity challenge	130
4.1.1.	Wage costs	130
4.1.2.	Productivity	131
4.2.	Fiscal support	131
4.3.	Conclusions	132
Annex		133
