<p>Reclaiming Democracy: The Strategic Uses of Foreign and International Law by National Courts</p> <p style="text-align: right; margin-right: 20px;"><i>Eyal Benvenisti</i></p> <p style="text-align: right;">241</p> <p>In response to the increasing pressure on governments, legislatures, and courts to conform to global standards, courts in several democracies are seeking to strengthen the ability of their governments to stand up against interest groups and powerful foreign governments, and to expand the space for domestic deliberation. By coordinating policies with counterparts in other countries through the common language of international and comparative constitutional law, courts can contribute to reclaiming democracy from the grip of globalization.</p>	241
<p>Legislation and Adjudication in the UN Security Council: Bringing Down the Deliberative Deficit</p> <p style="text-align: right; margin-right: 20px;"><i>Ian Johnstone</i></p> <p style="text-align: right;">275</p> <p>This article draws on the theory of deliberative democracy to examine the legitimacy of the quasi-legislative and quasi-judicial acts of the UN Security Council in creating the counterterrorism regimes under Resolutions 1267, 1373, and 1540, whose implementation requires broad international support. It argues that improving the quality of the Council's deliberations will enhance the effectiveness of similar decisions and recommends a set of reforms designed to bring down the "deliberative deficit" in that body.</p>	275
